PROFESSIONAL SUMMARY

Software Development Engineer at actyv.ai® specializing in backend development, workflow automation, and AI-powered applications using Python and Django. Skilled in REST APIs, scalable systems, and Data Structures & Algorithms with a passion for building efficient enterprise solutions.

EDUCATION

Master of Computer Applications (MCA) | Sep 2024 – May 2026 | CGPA: 8.4

Nadimpalli Satyanarayana Raju Institute of Technology, Visakhapatnam – JNTU-GV

Minor in CSE & NextGen Technologies | Sep 2024 – Oct 2025 | CGPA: 8.5

Indian Institute of Technology (IIT) Mandi, Himachal Pradesh

Bachelor of Science (B.Sc) in Computer Science | Aug 2021 – May 2024 | CGPA: 8.74

Punyagiri Degree & PG College, Vizianagaram – Andhra University

EXPERIENCE

Software Development Engineer-1 | Actyv.ai® Pvt Ltd, Bengaluru | May 2026 – Present

- Contributing to enterprise workflow automation, backend development, API integrations, and AI-driven process optimization solutions for global clients.
- Collaborating with cross-functional teams on scalable solution implementation, testing, deployment, and operational efficiency improvements.

Python Full-Stack Intern | Glossary Soft Tech Pvt Ltd, Hyderabad | Jan – May 2024

- Developed an AI-based image background removal tool using Python, Django, Pillow, and rembg for automated image processing.
- Built a responsive interface using HTML and CSS supporting image uploads and instant background-removed results.

Python Short-Term Intern | GlobalOne Services, Hyderabad | Aug – Sep 2023

- Developed a terminal-based Rock-Paper-Scissors game in Python using randomized computer move generation.
- Structured reusable game logic functions and improved code readability through refactoring and basic testing.

SKILLS & TECHNOLOGIES

- Programming Languages:** Python, JavaScript, C
- Web & Backend Technologies:** Django, REST APIs, HTML, CSS
- Databases:** SQL, MySQL
- CS Fundamentals:** Data Structures & Algorithms, OOPs
- Tools & Platforms:** Git, GitHub, VS Code, Netlify, Render

PROJECTS

1. CareerAI – AI-Powered Career Assistance Platform | Python, Django, NLP, Machine Learning

- Engineered a full-stack AI platform using Django and NLP (TF-IDF) to automate resume-JD matching, skill-gap analysis, and ATS-compliant resume generation.
- Designed a responsive, mobile-first UI and Admin Dashboard for active job management, integrating voice/text analytics to enhance candidate job readiness and engagement.

2. Banking Management System | Django, Python, SQLite, HTML & CSS, JavaScript

- Developed a secure Django-based banking system using MTV architecture with custom authentication, atomic transactions, and an admin dashboard.
- Implemented core banking features including deposits and withdrawals for savings accounts, fixed deposit creation, and P2P transfers with automated fee handling and transaction tracking.

CERTIFICATIONS

- The Full Stack** – Meta (Coursera)
- Crash Course on Python** – Google (Coursera)
- Agile Project Management** – HP Life | HP Foundation
